INCREDIBLE CRETE

*"I'm glad to be Cretan, my word I do keep.
With mantinades I sing, with mantinades I weep."*

Welcome to Crete! The land of ancient Gods and Titans, the island of myth, history, rich culture, beautiful nature, paradise beaches and fine gastronomy.

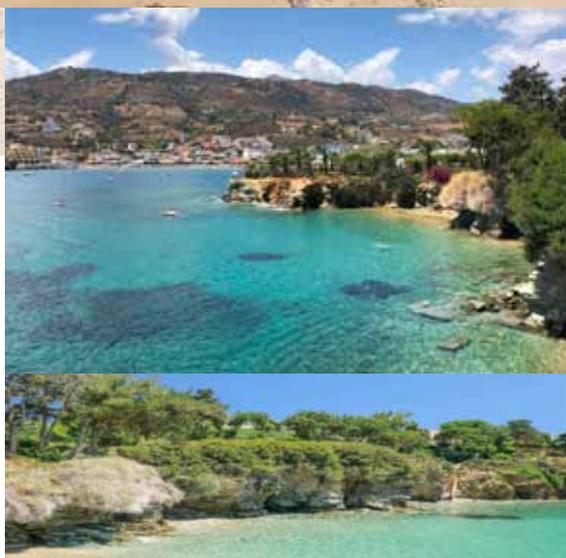

Crete is already well known in Europe and around the world for the sun and sea escapes and its diet that is considered to be one of the healthiest and tastiest in the Mediterranean. What you will also find out when you visit Crete is that it offers almost everything one would wish. Cities and traditional villages, dream beaches and beautiful mountains, a buzzing nightlife and secluded natural hideaways, a variety of recreational ideas and sports as well as deep-rooted traditional customs. Add one of the world's top archaeological sites, Knossos, and the world renowned Cretan hospitality to the mix for the experience of a lifetime.

ACRO SUITES a well being resort

On the edge of a rocky cliff in Mononaftis Bay you will have found your destination. Acro is located 22km from the airport of Heraklion, the largest city and capital of Crete. The distance from the city centre and the port of Heraklion is just 18km., enough to offer the peacefulness of a retreat but less than a 20 min drive. Mononaftis Bay is in the beautiful area of Agia Pelagia, one of the most touristic areas near the city. In ACRO you will enjoy the seclusion that the resort has to offer and you will be minutes away from several beaches and the seaside cafes and restaurants of Agia Pelagia. With no doubt it is the best place to stay in Crete!

BEACHES IN CLOSE PROXIMITY FROM THE RESORT

Mononaftis Beach: walking Distance from the hotel (accessible also with an elevator). It is a beautiful pebbly beach with crystal clear waters. According to the tradition, a ship was sunk here once and only one sailor survived. This story gave the name Mononaftis to the beach, which means "One Sailor". The beach is an award-winning diving center so don't forget to add this in your list!

Psaromoura Beach: it is around 2 kilometers driving distance and there you will enjoy the white pebbles with paradise blue waters. On the north end there is a large rock with many foldings which protects the beach from the waves.

Ag.Pelagia Beach: it is around 3 kilometres driving distance and is the main sandy beach of the settlement full of restaurants, cafes and night buzz. It is a long and narrow beach with sand and greenish water. The sea is almost always calm here and the bay forms a natural quiet harbor.

You can also explore a variety of pure, natural beaches that are accessible by boat directly from our hotel (for example **Fylakes Beach**, a magnificent Natura beach with crystal clear turquoise waters, small but perfectly formed and definitely the jewel of the area).

TOP EXPERIENCES IN CRETE DAY TRIPS

PALACE OF KNOSSOS 5km south of Heraklion. It is impossible to visit Crete without touring the Palace of Knossos, the pre-eminent Minoan settlement and one of the most famous archaeological sites in the world. Discovered in the late 1870s it was excavated by Sir Arthur Evans for 30 years and is linked through Cretan myths with King Minos, son of Zeus and Europe. Minos may have ruled in legend, but it now seems more likely 'Minos' was not a single king but the title given to the rulers of Knossos. The palace covers an area of 20,000 sq m and is so large and contains a labyrinthine that scholars believe it was the inspiration for the myth of Theseus and the Minotaur.

PREVELI MONASTERY You will be delighted with the magnificent view of the Libyan Sea. You can admire the wood carved chancel with religious icons that are real masterpieces and represent scenes from the Bible in a detailed way. Some of these icons date back to 1750. The catholicon of the monastery is a two-aisled popular art church, built in 1836. It hosts the old abbey, which is used today as a guest house. You will also find a small museum exhibiting religious icons that date back to the 19th century. Make sure you visit Preveli Beach, one of the most beautiful in the island!

THE CRETAN AQUARIUM The CretAquarium is part of the Thalassocosmos, one of the Mediterranean's largest complexes devoted to marine science, education and recreation. It provides face-to-face contact with the vibrant sea life of the Med - from hunter sharks to tiny seahorses. A fascinating and educational day out for children and adults alike.

SAMARIA GORGE 43 km south of Chania, it is the longest gorge in Europe and belongs to the Samaria National Park. Visitors can choose the long route (16 kms) or a shorter version starting from the sea on the south coast and walking to the "Iron Gates" (3.5 kms)

GRAMVUSA ISLAND (BALOS) A small island with an impregnable castle. Famous for its unique lagoon, with its blue green waters, its pink sandy beach and famous shells. Even Caribbean visitors envy this region!

ELAFONISSI An amazing beach and a captivating landscape. The island is 100 m off the coast and you can walk all around it. Admire the white beach full of seashells but make sure you don't take any of these back. It is a Natura protected environment.

SPINALONGA is an island located in the Gulf of Elounda in north-eastern Crete, in Lasithi, next to the town of Plaka. During Venetian rule, salt was harvested from salt pans around the island. The island has also been used as a leper colony. Spinalonga has appeared in novels, television series, and a short film.

FALASARNA is located on the West coast of Crete and, similarly to Elafonisi is popular with day trippers because of its stunning beaches and clear turquoise blue sea. It consists of several sandy beaches of various length, all facing the West (which makes it a wonderful place to watch the sunset from). The sea is generally very clean and with lovely colours because of the sandy bottom.

VAI PALM TREE FOREST (FOINIKODASOS) The palm beach of Vai is one of the largest attractions of the Mediterranean island of Crete. It features the largest natural palm forest in Europe, made up of Cretan date palm. According to the legend, the trees have grown from discarded date stones thrown into the sea by Saracen pirates. However, the palm grove is more than 2000 years old and the pirates are more recent. Thus this hypothesis has changed and the Saracens have been replaced with Phoenicians, that governed the Mediterranean Sea 20 centuries ago.
